ROYAL CAFE, STONY PLAIN.

FULL-COURSE MEALS, 25c. Up.

FROM 12-2, and FROM 6-8.

Ice Cream, Soft Drinks, Confectionery, Fruit.

L. M. LARSON, Proprietor.

Good Faith—and a Good Name!

Money—the financial resources of small investors—was loaned Alberta in good faith, and at a time when the province needed help. Shall we break faith with these, our fellow-citizens? Shall we not rather preserve our good name of being "square shooters"? Shall we not rather build up than break down the integrity and honesty which are, without doubt, the best policy?

Alberta is a great province, with wonderful natural resources. The development of these resources offers a bright future. This outlook has been hampered by ill-conceived legislation aimed to "soak the rich" but which in reality hurts the little fellows.

A prominent Canadian, who, by the way, is a successful Western farmer, declared that the drastic steps recently taken by the Alberta Government had, quite naturally, destroyed public and, to a certain extent, private credit; but he felt that the native common sense and judgment of the vast majority of Albertans would assert itself because they know that financial integrity and financial honesty are always the best policy.

This statement is one of a series written by The Mortgage Lenders Association of the Province of Alberta. The Association is composed of 34 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

(The sixth statement in this series will be published in two weeks.)

FUTURES MARKET BRINGS GREATER RETURN TO FARMER

The Grain Trade Presents Its Case to the Turgeon Royal Grain Commission.

By SAM ROSS.

Criticisms of Canadian wheat pools, effectiveness of the open market and futures method of trading and troubles at the root of Canadian wheat marketing difficulties, were detailed to the The Turgeon Royal Grain Commission last week by Secretary A. Darby, Winnipeg Grain Exchange.

Tracing history of the Winnipeg Grain Exchange, Mr Darby said the Exchange was an indispensable part of grain marketing machinery. Existence of the futures market and its use for hedging purposes "undoubtedly result in increasing the prices received by the producer."

Mr Darby pointed out the period from 1925 to 1931 saw the growth of the Canadian Wheat Pools and the culmination of their operations "in financial complications which were prevented from assuming the proportions of a major disaster only by the intervention of the Provincial and Dominion Governments whose assistance was given by way of guarantees."

Principles upon which the Canadian wheat pools operated made failure certain, Mr Darby charged. The Pool policy was to operate for higher prices, which brought increased produc-

Continued on Page 8.

The Tourist Traffic.

Does Stony Plain intend letting another season go by, without making an effort to get some of the tourist trade from travellers who pass this town? With a season of greatly increased tourist traffic to Jasper Park about to open, the question of auto camp accommodation for travelers on the Jasper Hiway should begin to engage our attention.

When the estimates of the Prov. Department of Public Works are brought down at the forthcoming session of the Legislature, it is believed there will be provision made for hard surfacing the stretch of road from Wildwood right thru to Jasper Park.

Taking Edmonton as an example of a center which has been preparing for the tourist traffic, one notes it is expected that about \$18,000 will be spent on auto camp improvements there. During 1936 the Edmonton camp had a revenue of \$3250, while after making some improvements, there was a net profit of \$500.

Now is the time for those in the towns on a main highway to act, and arrange for the construction of an auto camp. When a good camp is available, thousands of dollars are spent by tourists in the community which the camp is designed to serve.

Inga Councillors.

Inga Councillors are billed to meet at the Secretary's office on Monday, Feb. 8th.

The annual meeting of ratepayers of Inga Municipality will be held on the third Saturday in February—the 20th. The meet will be held in Stony Plain.

This year the new three-year term for Councillors comes into force, necessitating only 2 Councillors appealing to the electorate next month.

By agreement, the Councillors whose terms expire this year are John Staub, Div. 6; A E Hopkins, Div. 4.

A perusal of our advertising columns will disclose the fact that Inga Municipality is offering for sale NE 36, 53, 1w5. This land should make a good buy, at the price asked.

The Traveling Boxer.

After a fourteen-day trip across the Atlantic, Don Carmichael was due to arrive at the Port of London this week, having sailed from Sydney, Cape Breton, the week of January 12th. At the latter city he had been successful in negotiating up with a boxing match, and had been given the decision. He had several more engagements in sight, but when offered a passage over the briny, Don could not resist the offer. He carried good credentials, and should have no trouble in connecting with some of his own class when he arrives in the heart of the Empire and recovers his shore legs.

With the Moviemans.

The Moviemans brought another good Western picture to Kelly's Hall on Saturday night. The film featured Jack Perrin in "Riding Law." The added attractions were well up to the standard, and included Clark & McCulla in "The Medicine Man" and the old timer Charlie Chaplin in "His 8th Past."

HARDWICK'S

YOUR HOME TOWN STORE.

Firmly-woven Cotton Hose for "Everydays."

Seamed back and fashion marked; hemmed top; reinforced at heel and toe; shades, Javatan or Light Gunmetal; sizes, 8 1-2 to 10. Per pair, 15 cents.

Good Quality Turkish Towels.

They do a real job of quick and easy drying; unusually low priced because bought for a leader; self-fringed ends; Ecru shade with pattern in bright color; 20x45 inches. Each 25c.

White Cotton Tablecloths.

Firmly Woven with neat border design; they are already hemmed, so you can use them at once; size 50x50 inches. Each 59c.

"Penman's" Extra Heavy All-wool Liners.

Tufted on inside; plain black, plain grey, or black and white mixture. 49c pair.

Youths' Lined Leather Mitts.

Cream horse face and muleskin back; elastic knitted wrists; sizes 7 and 8. 65c per pair.

Grocery Specials—Lots of them.

Snowdrift Coconut, 1 pound for 19c.
Sunland Cheese Nips, cello pack, 9c packet.
Aylmer Tomato Juice, 2 big tins for 25c.
Ogilvie's Oats, large packet for 23c.
Aylmer Mushroom Soups, 2 tins for 19c.
Saur Kraut, Aylmer brand, big tins, at 18c.
Nabob Baking Powder; 16-oz. tin for 20c.
Jubilee Jellies, specially priced, half-pd. 10c.

Faster Cruising Speed Of Commercial Planes Provides A Problem For Airports

Increase of nearly 100 miles an hour in cruising speed of commercial planes in the past five years has provided a problem for airports on the trans-Canada airways that the government is meeting with direct financial assistance.

Hon. C. D. Howe, minister of transport, explained the purpose behind a recently-aligned order-in-council empowering the government to assist municipalities on the trans-Canada airway which will be inaugurated next summer.

"Some years ago," he said, "a number of cities on this route provided airports at their own expense, but progress in aviation has brought larger and faster aircraft into use and facilities which were satisfactory at that time no longer meet the needs of modern air services."

"It is felt that the efficient operation of the trans-Canada airway is contingent on the provision of proper airports in the principal cities to be served and the financial position of those cities to-day renders it difficult for them to undertake the improvement of existing airports or the provision of new airports suitable to modern requirements."

"The government has, therefore, undertaken to extend a measure of financial assistance to the municipalities concerned to the extent of not more than one-third of the amount already expended by such municipalities on improved airports; also not more than one-third of the amount which any municipality on the trans-Canada airway may agree to expend on improvements to existing or new airports on the airway."

Hangers and heliports do not come within the order-in-council.

In making the airport improvements, departmental officials said, speeds of at least 200 miles an hour will have to be considered. Five years ago the average cruising speed of commercial aeroplanes was about 100 miles an hour; now it is 180 miles or more.

King George Approves Plans

Full Schedule Of Coronation Events Has Been Announced

Britain will celebrate the coronation of the king on May 12, with an 11-week program of dinners, levees, balls and reviews expected to surpass the pomp and circumstance originally scheduled for Edward VIII. The full schedule of events, beginning with a court reception May 5 and ending with a garden party at Buckingham palace July 22, was approved by the king and announced by the Duke of Norfolk.

King George will broadcast a message to the empire the evening of May 12, review the fleet May 20 and make state visits to Scotland and Wales in July.

The ceremony of trooping the colors in honor of the king's birthday anniversary will be celebrated June 9. The final route the coronation procession will follow from Buckingham palace to Westminster Abbey and return was announced without change, to the relief of thousands who already had purchased tickets.

The royal servants at the state banquet and other functions will be attired in full state livery, with knee breeches, silk stockings and coats of scarlet, dark blue and gold.

The dinner to be given by the Duke of Gloucester in the eve of the coronation will be a indication of his position as the first member of the royal family next to the succession to the throne—the position normally occupied by the Prince of Wales. The king's broadcast May 13 probably will be made from the study in the palace from which King George V. made his broadcast to the empire on his silver jubilee in 1935.

The state service of gold plate and the "Garter" chain will be used at the state banquet.

Correct glasses do not weaken the eyes in any way; they may prove harmful, however, if worn after examination proves them unnecessary.

She: "Why do you always eat with your knife?"

He: "Because any fork leaks."

Language Corrupted

Says Canadians Are Slipping In Use Of Good English

C. Egerton Love, international examiner of the Trinity College of Music, London, England, says Canadians are slipping as far as the English language is concerned. He maintains they speak "American," not English.

He describes the lapse as "lip and tongue laziness," but adds: "I'm not complaining, but personally I do think it a pity; English is such a beautiful language—this English of Shakespeare, Milton and a hundred others."

"When in Toronto in 1928 it was the exception to find wrong pronunciation of words and mispronunciation of the vowel 'u' and of the short 'a' where we use the broad 'a', but now the Canadian speech is going well on the American side, and this makes a difficulty where candidates on our examinations are reciting great English verse or prose."

"Unoubtedly to-day the language is being corrupted in a great many ways and while I don't like to speak with disrespect about any country, the Americans among themselves have corrupted the English language," he said. "In fact, it is not the English language that is being spoken in America to-day. It is the American."

Has Its Drawbacks

Women Would Get Little Pleasure Out Of Regional Cooking

Women in working-class homes spend too much time preparing and clearing away meals, writes a doctor in the "British Medical Journal." To ease their burden he suggested regional cooking arrangements.

A sound enough scheme and one which should appeal to the over-worked housewives. But if it led to the general establishment in this country of the "kitchen factories" of Soviet Russia, there would be excuse for expressing regret.

In those Russian institutions the housewife can buy her joint and other things ready-prepared. All she has to do is to pop them in the oven and keep an eye on the clock. Delightfully simple, but—

"This is nice—do tell me the recipe," Those are words that give great pleasure to most women. How annoying to have to admit that she had no part in the making. And how lost we would all be if we couldn't say of some particular meal that it was as good as any that mother ever prepared with her own hands—London Sunday Pictorial.

No Number Thirteen

Because Railway Sleepers Have Room For Only Twelve Berths

Conversations like to look up superstitions and are prone to tell listeners that most all of us are subject to beliefs of silly sentiment. They say the figure "13" is seldom used by those catering to the general public in hotels or ships or trains. It is hardly true. Of course, it is particularly a fact that you never meet a "No. 13" berth on a railway sleeper. However, there is good reason why a sleeping car has no berth 13. Those now used have room for only 12 compartments, upper and lower. And they do not have fourteen or fifteen either.—Brandon Sun.

The Patient Sailor

During the first evening of a visit to her daughter at the seaside an old woman who had never seen the sea before was found intently watching the lighthouse.

"What infinite patience sailors have," she said.

"Why?" asked her daughter.

"Well," she replied, "the wind has blown that light out 38 times since I've been watching, and each time they relighted it."

The best vitamins on the market to-day are plenty of sunshine, fresh food and pure air. With these the most of folks will be able to get along.

Men With Experience

Employers Should Not Reject Workers No Longer Young

President Roosevelt has made a special plea to industry to employ men over 40. This is certainly a good move because it is men over 40 who have the larger financial responsibility, and they are just as much entitled to employment as younger men. It is an unfortunate fact, however, that so many employers will scarcely look at a man of middle age and beyond unless they are seeking cheap labor, then they think a man should consider himself lucky to get a job at all. Advertisements can be seen in big city newspapers every day for men with the stipulation that they be not over 30 or 35.

Some years ago Henry Ford erected a plant at Ypsilanti, Michigan, and before doing so he ascertained the ages of the male population. He then directed that, an exact cross-section be employed, the result being that a percentage of the new jobs were given to men of 40, 50, 60 and even 70. He intimated later that he was satisfied with the arrangement.

The virility of youth is a splendid thing to have, particularly if they are allied with it the best kind of training. But there is one thing youth cannot have, and that is experience. An older head which has had to deal with office or factory problems is often much better than "book learnin'" and every man who has reached the second half of life has had cause to be thankful for that experience. And employers have, too.—St. Thomas Times-Journal.

Old Proverb True

Cleveland Merchant Found Saving Pennies Brought Him Dollars

In Cleveland lives a merchant who has paid off a mortgage on his little store by saving pennies. The prosaic statement of the old proverb, "Take care of the pennies and the dollars will take care of themselves," may not be sensational, but the actual instance of some one applying the principle in practice was considered worthy of publication in a good many newspapers. Why? Because the man kept up payments consistently during the entire depression period when a host of people were excusing themselves for not paying debts because times were hard. He saved and applied to his obligations the little sums that others were letting slip through their fingers as too small value to be accounted for. And what did he get for his pennies? The payment of his debt and the maintenance of his honesty and self-respect. That's a big pennyworth!—Detroit News.

Has Balanced Budget

West Vancouver, unique among British Columbia municipalities, has balanced its budget and has a surplus of cash and provincial government credits amounting to \$6,280. Reuben J. B. Loyland told residents of this wide-spread district on the north shore of Burrard Inlet at a stewardship meeting there.

Even A Beginner Can Knit This

Don't envy others their precious "hairpins!" Make some for yourself! Knit one of these simple squares, then repeat the easily learned pattern—and in so doing you'll be saving your needles. When you've got a number laid by, join all together for a handsome bedspread, easy dinner or tea cloth, stunning scarf or pillow. They'll be light, yet durable, done in string. In pattern 5557 you will find complete instructions for making complete squares shown; an illustration of it and of the stitches used; material requirements. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newsprint Union, 176 McDermott Ave. E., Winnipeg. There is no Alice Brooks pattern book published.

American Funds Will Be Available To Preserve Duck Areas In Canadian West

Tribute To A Horse

Dynamic Little Black Horse That Could Not Be Conquered

A new headstone marks a lonely grave on Colorado's plains. It is a cowboy's tribute to Midnight, the "backingest" horse of them all.

In life, he was the arch-enemy of the top hands who ride the nation's rodeo circuit. Only once in 14 years from coast to coast did a waddle ever manage to stay on him—and then Midnight was old and tired.

Last November, when Midnight died after three years in retirement, he was buried in a grave on the ranch of McCarthy and Elliott, who had shown him during his career.

The cowhands at the ranch talked, during the long evenings, about the dynamic little black horse that could not conquer. They recalled he wasn't vicious, that he never tramped a rider he'd tossed.

Finally, they decided to erect the marker—with a poem on it. Every hand on the place collaborated in writing that epitaph, and it rhymes—after a fashion.

Now, the passersby who chance past the grave reads:

"Under this sod lies a great bucking horse
That never lived a cowboy he couldn't toss.
His name was Midnight; his coat black as coal,
If there is a horse-haven, please, God, rest his soul."

Good Word For Cows

Agricultural College Employee Thinks They Are Smarter Than Horses

Take it from Miss Pearl Gardner of Cornell University's Agricultural School, the cow is not so dumb as her out-crying propensities have indicated. Five years of tests made with 72 horses, 48 cows and 11 sheep have convinced Miss Gardner that the cow is smarter than the horse and the sheep Dobbin's mental age. "Cows," she told the American association for the advancement of science, "catch on quicker, remember better." The horse has gained his reputation for intelligence because of the fact that he trusts man far more than any other barnyard animal. Miss Gardner found no difficulty in teaching sheep to do tricks, such as taking a handkerchief out of her pocket, rolling a barrel and shaking hands, "just as easily as a horse." So now we may be expected to extol "cow sense" as the ideal of stock thinking.—Detroit Saturday Night.

Belgian linen factories are working full time to supply tents and uniforms for European armies.

The earth revolves about the sun in 365 days, 5 hours, 48 minutes, and 45 seconds.

Interesting figures were revealed at a conference attended by representatives of the Dominion Government, the United States Government, provincial governments and others concerned, called to consider matters relating to conservation of wild animals and birds. It was reported that the annual turnover in Canada's business directly dependent on migratory birds alone amounted to \$3,500,000, and insectivorous birds are estimated to have an annual value to Canadian production of \$100,000,000.

Rapid depletion of game supplies in the southern parts of the Prairie Provinces and elsewhere were regarded with concern, but a report was received from the Central Experimental Farm at Ottawa that successful breeding of wild ducks in captivity had been demonstrated. It was intimated that this industry might grow to large proportions but legislation would be necessary to permit the sale of wild ducks when raised under domestic conditions.

The Indian, apparently, compares favourably with the white man as a conservationist of game. The delegates paid tribute to the Indians in this connection and complained of the destructive habits of white men.

A despatch from Washington says that United States waterfowl hunters are organizing to improve the "duck factories" of Canada.

The More Game Birds foundation announced the formation of "Ducks Unlimited," a national organization of American hunters incorporated as a non-profit foundation. Its objective will be to preserve and restore Canadian duck breeding grounds.

"The program calls for the raising of several hundred thousand dollars annually during the next five years," the announcement said. "All capital to be repaid by the duck factories will be raised in the United States."

Although more than \$20,000,000 of United States government money has been spent on water and waterfowl restoration projects in recent years, the foundation estimates only five per cent of the prairie-breeding ducks now nest in the States. Thirteen per cent nest in the southern half of the Canadian provinces, Alberta, Saskatchewan and Manitoba, and 82 per cent, have been driven further north.

Premiers of the Canadian provinces and conservation groups have offered their co-operation. It is proposed to set aside and place under supervision possibly a million acres of Canadian refuges.

The Latest Invention

Tub-Table-Stove Combination Idea Of Ohio Man

Alfred Castanien, 32, felt the country needed "a good bath tub" so he set to work in the attic of his home in Columbus and finally came up with a tub-table-stove combination which becomes one or the other as the housewife desires.

"There are somewhere between 6,000,000 and 15,000,000 homes in this country without regular tubs," Castanien declares. "Now, after eight years' experimentation, I have what the nation needs—a good tub."

"The table has a stove at one end and for gas or oil heating of water for the tub, which is revealed when one presses a gadget or two."

The whole affair is raised from the floor so, as Castanien points out, "you don't have to move it to sweep under it."

Another Reading

"I visited a phenologist to-day and had my bumps read," Bottle told his wife. "He complimented me on the possession of a head with razorlike qualities."

"Did he explain what he meant," his wife asked quietly.

"Well, no," replied Bottle, "but I gathered he'd noticed the keen edge of my ready wit and my clean-cut methods of reasoning."

"It is the surmised," "If he knew you as I do, he'd probably consider your head hollow ground."

In the United States, 30 years ago, there were only eight varieties of soy beans grown, but now over 90 varieties are listed in seed catalogues.

WORLD HAPPENINGS BRIEFLY TOLD

The king, as visitor of the University of Wales, has approved the election of the Duke of Kent to be chancellor of the University of Wales.

New Canadian coins, bearing the effigy of King George VI, will appear this year, probably about the time of the coronation in May.

Extension of the criminal investigation branch of the Royal Canadian Mounted Police to include laboratory at Ottawa is provided in the main estimates before the House of Commons.

Five directors recently appointed in the Department of Mines and Resources under the reorganization will each receive a salary of \$7,500, estimates before the House of Commons disclosed.

Net revenue from radio receiving license fees for the last fiscal year totalled \$1,574,431, according to the annual report of the marine department. This was an increase of \$87,023.

Prince Chichibu, brother of the Emperor of Japan, and Princess Chichibu will visit Canada on their way to the coronation of King George VI. It was announced by the Japanese legation.

Work on a \$400,000 tuberculosis sanatorium, Jamaica's memorial to King George V, has commenced. Funds for the five proposed four-story structure were collected by subscription during the jubilee year.

Competent Canadian engineers are in demand in British West Indies, J. B. Christian of Trinidad told Toronto newspapermen. Christian said there were a large number of positions open, particularly in oil developments.

Hard On Astronomers

Eclipse Of Sun Will Last Longest In Middle Of Pacific Ocean

The longest total eclipse of the sun since 1804, lasting seven minutes and four seconds, is the chief event on the astronomer's calendar for the new year. This will happen on June 8. Unfortunately, there is no land at the place where it lasts longest, in the middle of the Pacific Ocean. Useful observations can be made from shipboard, but the slight unsteadiness of a ship, even on a calm sea, will prevent many researchers for which this long eclipse would be ideally adapted.

The shadow will first touch earth in the Pacific Ocean in the vicinity of the New Hebrides, where the sun will rise eclipsed. Then it crosses the ocean and leaves the earth in Peru, where the sun sets while still hidden. At both the beginning and end of the track, the duration will not be as much as at the centre, and the sun will be very low in the sky, which will hamper observations—Detroit Saturday Night.

FROCK WITH BACK FLARE WINS HONORS AS "SEASON'S SMARTEST STYLE"

By Anne Adams

Candidate for the title of "The Season's smartest style"—Pattern 4253! And it's guaranteed to carry off honors at parties, teas, luncheons and all gala events! Just see the glorious flattery of its soft V-neckline, the individuality of its part little puffed sleeves—and, we're saving the best for the last, have you noticed the skirt with its fascinating back flare? See the way the stitched waist-yoke merges into a half-belt, topping the graceful skirt. You'll find yourself turning your back to make more than one dramatic exit in its full swirl! Any number of appropriate, inexpensive fabrics would enhance the sparkle of this frock, among them silk, jersey, or a triple sheer.

Pattern 4253 is available in sizes 12, 14, 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42. Size 18 takes 2 1/2 yards 39 inch fabric. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Ask Bounty On Coyotes

A resolution requesting that the provincial government place a bounty on coyotes was passed by the Alberta Provincial Horse Breeders' Association at Edmonton. It was claimed that coyotes were increasing in numbers and growing much bolder in parts of Central and Northern Alberta.

SUNDAY SCHOOL LESSON JANUARY 31

THE FINANCIAL COST OF ALCOHOLIC BEVERAGES

Golden text: Wherefore do ye spend money for that which is not bread? and your labor for that which satisfieth not? Isaiah 55:2.

Lesson: Proverbs 21:17, 23, 20, 21; Matthew 24:43-51; John 4:36, 37, 38. Devotional reading: Proverbs 23: 29-32.

Explanation And Comments

Alcoholic Beverages Tend To Poverty, Proverbs 21:17; 23:20, 21. Oil was used at banquets for anointing, and by "the that loveth oil" the writer of our first excerpt from Proverbs meant one who cared for banquets with wine flowing freely.

Does indulgence in alcoholic beverages tend to poverty? "The National" of the Lucy Webb Hayes Training School answers: "Alcohol will remove grass stains from summer clothes, it will also remove summer clothes, also spring and winter clothes, not only from the drunkard but also from his wife and children. It will also remove household furniture from the house and estates from the pantry, the smile from the face of his wife, and the happiness from the home. As a remover, alcohol has few equals."

In our second selection from Proverbs, drunkenness refers to the state that follows nights spent in drinking. Moffatt translates the lines thus:

"Never sit down with tipsy men or among gluttons. The drunkard and the glutton come to poverty. And revelling men in rags. I am not a temperance lecturer in disguise," said Andrew Carnegie, "but a man who knows and tells you what observation has proved to him, and I say to you that you are more likely to fall in your career by acquiring the habit of drinking liquor than from any of the other temptations likely to assail you."

Alcoholic Beverages Make a Man Brutal, Matthew 24:45-51. Chapters 24 and 25 of Matthew were uttered by Jesus on the last Tuesday of his earthly life. In his parable of The Two Servants, the evil servant, whom his lord had set over his household during his absence, saw that his lord delayed his coming, and being only an eye-servant he became unfaithful and began to beat his fellow servants and to eat and drink with the drunken. His master will return unexpectedly and finding him in this condition, will put him to the sword. His master will return unexpectedly and finding him in this condition, will put him to the sword. His master will return unexpectedly and finding him in this condition, will put him to the sword.

The King's Police Officer

Inspector Cameron Will Remain In Service Of George VI.

Inspector Cameron, King George VI's special police officer, will return to former fields of service when their majesties go to Buckingham Palace. He was associated with Chief Inspector Green, King George V's police officer, as Queen Mary's special officer. On the death of George V, and the general reshuffle of duties, Mr. Cameron, whose first association with the Royal family duty was with the Duke of York, rejoined the Duke, and will now continue with His Majesty in the new regime, says the Daily Sketch. It is uncertain whether Chief Inspector Storrier, who went to the Duke of Windsor when he left the country, will return to normal police duty or remain with the ex-king.

Gravity is so great on the sun that an ordinary man would weigh two tons there.

Royal Bank of Canada 68th Annual Meeting

Morris W. Wilson, President and Managing Director, Stresses Need for Orderly Recovery—Recommends Commission to Investigate Financial Relationships of Dominion, Provincial and Municipal Governments. Sydney G. Dobson, General Manager, Reports \$56,000,000 Increase in Deposits—Profits Improved—"Business Undoubtedly on Up Grade"

Warning against the dangers of a speculative boom, and a plea that recovery be maintained on an orderly basis, were outstanding features of the address of Morris W. Wilson, President and Managing Director, at the 68th Annual General Meeting of The Royal Bank of Canada.

That recovery was well on the way there could be little doubt, and "even the most sanguine would have hesitated a year ago to predict progress as great as that which has been accomplished during 1936," stated Mr. Wilson.

In addressing the meeting, Mr. Wilson said, in part:

"A serious drought again affected large areas in the West, with results that were disastrous to the farmers immediately concerned. These farmers who reaped good crops last year benefited materially by higher prices, but in the midst of a broad recovery, farm income has lagged behind."

"It is gratifying that the stocks of grain in Canada are again of normal proportions. Nature is in a fair way to take the Government of Canada out of the grain business. It is sincerely to be hoped that she will not be drawn into it again."

Industries

"Prices for newspaper have shown a slight increase during the past year and this, together with a heavier volume of sales, has brought encouragement to the newspaper industry."

"In the lumber industry there has been a satisfactory volume of demand from Great Britain ever since the beginning of their building boom. This demand has been maintained during the past year and is the most important factor in the improvement of conditions in lumbering."

"The value of Canadian minerals production established a new high record in 1936, amounting to approximately \$350 million compared with \$312 million in 1935. The prospects of the Canadian mining industry are more favorable than at any time in the past."

Employment and Relief

"Throughout the manufacturing industries of Canada, volume of production has been above the level which prevailed in 1926 and in October reached the highest point recorded since July 1929.

Division of Taxes

Over a wide field of economic legislation it is virtually impossible to guess whether ultimate authority rests with the Province or with the Dominion.

"Let us secure a review of the whole subject by a Royal Commission with the object of resolving these complexities. Changed social and economic conditions have thrown responsibilities on various governing bodies that were never contemplated at the time of Confederation, and as a consequence it is found increasingly difficult, in some instances, to meet these additional responsibilities with the sources of revenue at their disposal. Having regard to the necessity of maintaining the national credit, if it is at all possible some solution must be found which will permit both provinces and municipalities to continue the service of their public debt in full."

Individualistic Democracy

"It is the fashion in certain quarters to say that the system of capitalism is in danger of being replaced by individualism—has failed. In the past it has adapted itself to changes in economic conditions and social concepts, and there is no reason to think that such adaptations

will not continue to be made. In fact, they must be made if the system is to survive. With Communism, Fascism and Nazism in competition, individualism will survive only if the benefits which it provides to the community continue to be greater than those conferred upon people living under other organizations of society.

Money

"It is for this reason then that the present monetary situation is an outstanding challenge to economic individualism. Can a popular government, such as that in the United States, for instance, deal effectively with the monetary situation? The revaluation of gold by the United States and the reduction in the gold value of other currencies, made almost unanimous this past year, the capitalization of the European gold bloc introduced a dynamic inflationary force into world economy. It is tending to degenerate into a somewhat definite action. The world has not previously experienced a period when the value of money was so low for so long a time. If continued on this basis an unhealthy and artificial situation will develop. Easy money is a powerful force; it operates somewhat slowly but to wait until it is evident that speculation is out of hand will be to create conditions which can be corrected only by depression. In some quarters we are asked to believe that the increased government regulation of general economy may make it possible to continue low interest rates more or less indefinitely. I feel strongly that this view is not correct, and that the action now being taken by the government is a serious interruption in recovery. It is a better bet that we maintain the upward trend for a prolonged period and that the recovery shall proceed in an orderly manner, with the minimum of interruption to irresponsible speculation. We must not on account allow recovery to degenerate into boom—the forerunner of depression. Individualistic economy will stand or fall, depending upon its ability to prevent depressions."

General Manager's Address

In reviewing the annual balance sheet, Mr. S. G. Dobson, General Manager, referred with satisfaction to an increase of \$54,668,757 in total assets, which were aggregated \$855,988,407, and to an increase in deposits during the year of \$56,579,909.

Current Loans Situation

"The demand for loans in Canada was again disappointing, though there have been indications during the last few months of increased requirements for business purposes. While advances under the heading of Current Loans in Canada decreased \$41,251,783 during the year, this does not mean that the requirements of our ordinary borrowers were that much smaller. The reduction is fully accounted for by repayment of two special loans, namely, about \$35,000,000 due by the Wheat Board liquidated principally through the sale of surplus stocks of wheat held under Government contract, and the repayment of approximately \$10,000,000 by the Canadian Pacific Railway, that company made by the chartered bank of Canada under Dominion Government guarantee."

"I give this information to correct an impression which casual consideration of the balance sheet in our Balance Sheet might create, that is, that business is still undergoing a process of liquidation."

Improvement in Business

A review of conditions in Canada and other countries in which the bank has branches indicates a definite improvement in business in Canada and in practically all of the foreign countries in which we are represented. Business is undoubtedly on the upgrade, and I look forward to 1937 with a greater feeling of confidence than has been justified for some years."

ROOSEVELT WOULD REMOVE CAUSES OF INJUSTICE

Washington.—President Franklin D. Roosevelt dedicated himself anew to the start of his second administration to removal of "cancers of injustice" that cause want in the midst of plenty.

As he did four years ago, Mr. Roosevelt repeated the oath in full. His head bobbing with the rhythm of the phrases, he weighed each word with obvious care and raised his voice perceptibly at the pledge to "support and defend the constitution." The word "defence" he accented heavily.

Then he turned to the dripping crowd before him and with no more ado launched upon his address.

"We will carry on!" he cried exultantly. Prosperity, he said, is tempting the nation to forget former progress.

"I see millions of families trying to live on incomes so meagre that the pall of family disaster hangs over them day by day.

"I see millions whose daily lives in city and on farm continue under conditions labelled indecent by a so-called polite society half a century ago.

"I see millions denied education, recreation and the opportunity to better their lot and the lot of their children.

"I see millions lacking the means to buy the products of farm and factory and by their poverty denying work and productiveness to many other millions.

"I see one-third of a nation ill-housed, ill-clad, ill-nourished.

"It is not in despair that I paint you that picture. I paint it for you in hope—because the nation, seeing and understanding the injustice in it, proposes to paint it out."

In conclusion, the president vowed: "In taking again the oath of office as president of the United States, I assume the solemn obligation of leading the American people forward along the road over which they have chosen to advance.

"While this duty rests upon me I shall do my utmost to speak their purpose and to do their will, seeking divine guidance to help us each and every one to give light to them that sit in darkness and to guide our feet into the way of peace."

Progress in recovery is obvious, the president said, but the "new order of things" brought about since 1933 means more than that.

Mr. Roosevelt said the greatest change in recent eventful years was "the change in the moral climate of America."

"With this change in our moral climate and our rededicated ability to improve our economic order," he observed, "we have set our feet upon the road of enduring progress."

"In these last four years," Mr. Roosevelt said, "we have made the exercise of all power more democratic; for we have begun to bring private autocratic powers in their proper subordination to the public's government."

"The legend that they were invincible—above and beyond the processes of democracy—has been shattered. They have been challenged and beaten."

Mentioning the democratic process at another point, he made this assertion which occasioned some speculation as to whether he had the courts in mind:

"The essential democracy of our nation and the safety of our people depend not upon the absence of power but upon lodging it with those whom the people can change, or continue at stated intervals, through an honest and free system of elections. The constitution of 1787 did not make our democracy impotent."

Asks Work For Wages Policy

Ottawa.—Discontinuance of unemployment relief and substitution of a "work for wages" policy is urged in a resolution in the name of Dr. T. F. Donnelly (Lib., Wood Mountain) on votes and proceedings. Direct relief, says Dr. Donnelly, is demoralizing the people who receive it, increasing poverty and extending the period of depression.

A Temporary Measure

Japan's Control Of Foreign Exchange Considered Emergency Move

Ottawa.—Assumption of control of foreign exchange by the Japanese government is a temporary measure and will not permanently impair trade with Canada, trade experts believe.

Canadian exports to Japan have apparently been held up with those of other countries since the Tokyo government cut off the supply of foreign exchange, although no definite reports have yet been received by the trade and commerce department or the department of external affairs here.

The view here is the new system of exchange control put into effect recently is an emergency move.

As it is regarded as a matter of internal Japanese economy, officials here said no representations would likely be made by the Canadian government if all countries are treated the same way.

There appeared to be nothing in the trade arrangements effected a month ago between Canada and Japan that had a bearing on the matter, officials said.

Would Appoint Commission

Urge Probe Into Financial Difficulties Of Western Provinces

Ottawa.—Appointment of a royal commission to probe the financial difficulties of Manitoba, Saskatchewan and Alberta was urged on the senate by Hon. John T. Haig (Con., Winnipeg), in the debate on the address in reply to the throne speech. This step was necessary to save the credit of the prairie provinces and resultant injury to Canada's standing, New homes constructed to relieve unemployment should be free from municipal taxation, Senator Haig submitted.

Loan companies and financial institutions were being driven out of the west by the radical legislation enacted by these provincial legislatures, Senator L. S. McMeas, another Conservative member from Winnipeg, asserted. "Many of the difficulties of the western provinces are due to the provinces themselves," he stated.

Honorary Colonels

Canada Has 53 Honorary Lieutenant-Colonels House Is Told

Ottawa.—Canada has 53 honorary lieutenant-colonels, Defence Minister Ian MacKenzie told Jean Francoeur (Lib., Temiscouata) in the House of Commons. Included in this number is one who is carried superannuation to establishment.

The total number of regiments in the militia is 114, of which 109 are non-permanent and five permanent. Lieutenant-colonels total 92, of which six are superannuated.

Farm Loans

8,979 Loans Made To Farmers Under Farm Loan Act

Ottawa.—For the nine months of the current fiscal year, from April 1 to Dec. 31, 1936, 8,979 loans were made to farmers under the farm loan act, Hon. J. G. Gardiner, minister of agriculture, told the House of Commons. This involved a total of \$8,327,589, in actual disbursements.

Loans and disbursements in that period in the western provinces follow: Saskatchewan, 999 (\$2,203,619); Alberta, 377 (\$820,343), and British Columbia, 53 (\$104,573).

Enters U.S. Derby

Laconia, N.H.—Emil St. Goddard of The Pas, Man., has wired his entry for the world's championship Laconia sled-dog derby, February 5-7. The famous young Manitoban is credited with having won more sled derbies and more prize money than any other musher in the history of the sport.

Health Bill Set Over

Toronto.—Ontario government will not introduce health insurance legislation this session, Acting Premier Harry Nixon said. Hon. David Croll, minister of welfare, has been studying insurance and has conferred with British Columbia officials, that province having a health insurance scheme in operation.

WARNS OF WAR

Speaking in London recently, Field Marshal Lord Milne, intimated that he would not be surprised if a war raged in Europe within the next five months.

Cabinet Changes

Two Portfolios Change Hands In Alberta Government

Edmonton.—Alberta's government underwent reorganization when two portfolios changed hands. Hon. Lucien Maynard was sworn in as minister of municipal affairs in charge of relief and Dr. W. W. Cross as minister of trade and industry.

The 28-year-old Mr. Maynard, second youngest cabinet member in the British empire, was appointed a minister without portfolio last May to supervise Social Credit plans. He takes the ministry of municipal affairs from Provincial Treasurer Charles Cockroft who had held that portfolio since the government was formed.

Dr. Cross, acting minister of trade and industry since mid-November when Provincial Secretary E. C. Manning took indefinite leave of absence because of ill health, will remain in charge of the department of health. The ministers were sworn in by Chief Justice Harvey, administrator of the province. Premier William Aberhart and R. A. Anderson, clerk of the executive council, witnessed the ceremony.

Quebec Minister Visiting West

Montreal.—Discussions of rural problems between Hon. B. Dussault, Quebec minister of agriculture, and the ministers in western provinces, are planned during a tour which Mr. Dussault is making. The minister said he would spend three weeks in British Columbia, Alberta, Saskatchewan and Manitoba.

Europe In Ice Grip

Wrecks In Gale-Lashed Seas Cause Many Deaths

London.—Winter, tightening an icy grip over Europe, left many villages snowbound and was believed the cause of at least 51 deaths in gale-lashed seas.

Twenty-five persons drowned when a German ship sank in a Baltic blizzard. Twenty others were lost in the wreck of the Finnish steamship Savamäa off Norway's southern coast. Two French fishing boats were reported foundered with loss of six men.

Snow storms swept Scandinavia, most of Germany, eastern France and northern England. Huge waves pounded the coast of Britain and France along the English channel and the Atlantic.

The 2,388-ton Russian steamship Ilmen wirelessd she was drifting near the Shetland Islands, her rudder gone. A salvage ship put out to help her.

The Norwegian mailboat Venus saved 19 men from the Norwegian freighter Trym in the North Sea and started for Newcastle.

Passengers from a British mail ship who disembarked at Esbjerg, on the west coast of Denmark, to go by train to Copenhagen, on the east coast, had to return to Esbjerg, after spending the night on the train among snowdrifts.

Support For Civil Aviation

Appropriation Increased For Airports, Airways And Other Activities

Ottawa.—New support for civil aviation is being provided by the government. The 1937-38 estimate for maintaining and operating airways, airports and associated activities is \$1,222,917.

This appropriation, made public when the estimate was tabled, is \$481,610 higher than that for the current fiscal year.

While the estimate for maintenance and operation is up, that for construction is down from \$897,650 to \$761,355.

The program of building has advanced to a point where less money is needed for that purpose, transport department officials explained.

Meanwhile the government is getting inquiries respecting proposed contributions to municipalities which intend improving their airports or have already done so. Under a recent order-in-council the government is empowered to contribute one-third of the cost to such municipalities, provided they are on the trans-Canada airway to be inaugurated next summer.

ANCIENT CORONATION CHAIR READY FOR CEREMONIES

Those Canadians who have visited Westminster Abbey will undoubtedly have seen the Coronation Chair, upon which all British monarchs are crowned, but it is doubtful whether they have ever seen it in the position shown above. No longer guarded by railings, the chair is shown as it will stand in the Coronation Theatre of the Abbey ready for use when their Majesties the King and Queen are crowned.

NEED A REVISION OF COST OF LIVING INDEX METHODS

Ottawa.—Survey and revision of the "theoretical and impractical" methods in compiling the living cost index published by the labor department and frequently referred to in wage disputes was urged upon the Dominion government by the Dominion joint legislative committee of the international railroad brotherhoods. In the recent hearings before the conciliation board, whose report is expected soon, it was claimed representatives of the employees had been placed at a considerable disadvantage by being confronted with "unreliable statistics compiled from somewhat antiquated methods," which did not reflect actual conditions and so could not be a reliable basis for wage adjustments.

The Canadian cost of living indices are merely estimates and not founded on comprehensive budgetary studies, the committee claimed. Recent detailed studies of consumption habits of the workers are lacking; instead, estimates are made, based on fragmentary and often out-of-date budget investigations.

The annual submission of legislative proposals by the railroad men was made to Hon. Ernest Lapointe, minister of justice, Hon. C. D. Howe, minister of transport, and Hon. Norman Rogers, minister of labor, the prime minister being occupied with a government caucus.

Many of their recommendations were admittedly reiterations of proposals put forward in former years. Amendment of the British North America Act so that Canada could change her own constitution; state health insurance; legislative protection of the workers' right to organize; opposition to the development of the St. Lawrence waterway for transportation purposes; regulation of motor vehicle transport by a transport commission similar to the railway commission.

Compendium was expressed for the government's efforts to solve unemployment. Many existing inequalities, they suggested, could be more easily adjusted if Canadian workers were "privileged, without fear of intimidation, to organize for their own common good and their right to do so was adequately protected," by legislation.

Proposed amendments to the railway act include a recommendation that \$500,000 per annum, rather than the present \$200,000, be provided for the elimination of grade crossings, and a recommendation that two men be required on all motive powered machines.

To Combat Influenza

Doctor Advises Best Thing Is To Build Up Resistance

Toronto.—Changes in weather react neither favorably nor adversely on influenza, says Dr. John T. Phair of the Ontario department of health. "There is no foundation for the presumption that cold weather checks the spread of influenza and the germ is not lying around on slushy pavements," he said. "The disadvantage of wet feet is offset by exposure in extra cold weather."

"The important thing is devising some scheme of raising resistance to the disease," he said. "The germ is in the nose and throat of a carrier or patient, and is passed on to some exposed individual, usually by a cough." Outbreaks of influenza were reported small in most districts. Most cases were of a mild nature. The death toll for the province stood at seven, five of which were in Toronto.

Group Will Be Smaller

Fewer Men In Military Contingent Going To Coronation

Ottawa.—A Canadian contingent representing all the different arms in the military service will go to the coronation in May but in smaller numbers than in 1911, the department of national defence said. The number has not been decided definitely, officials said, but it was thought not likely to exceed 300.

The Canadian government will pay the expenses this year and the appropriation is \$197,000.

Audit, 177.51.

AUDITOR'S CERTIFICATE.

I have audited the accounts of the Town of Stony Plain, Alberta, for the
year ending Dec. 31st, 1936, and have compared the said accounts with their
relative vouchers and certify that in my opinion the foregoing financial
statements are properly drawn up so as to exhibit a true and correct view
of the financial affairs of the Town, according to the best of my informa-
tion, the explanations given to me, and as shown by the records. I have
any qualifications mentioned in Auditor's Special Report herewith.
The statistical information contained herein was obtained from the
books and records of the Town, or from information supplied by officials
of the Town.

W. E. H. LEWIS, Stony Plain, Alta.

Dated at Stony Plain, Alberta, this 13th day of Jan., 1937.

AUDITOR'S SPECIAL REPORT.

All books and vouchers were found to be in good order, and in checking
throughout the year I found that same had been kept up to date.

Don't Lose Money

Crops consisting of mixed or unsuitable va-
rieties grade and yield poorly, so lose money to
the farmer. The higher the price of grain, of
course, the greater the loss suffered.

The use of good seed will avoid these losses. See the nearest
Seale (Home) Agent about securing good seed at cost
price.

tion and decreased consumption. This was economically impossible, he contended, and financial difficulties were inevitable.

"The consuming countries," said Mr Darby, "have adopted policies of restricting grain imports by means of tariffs, quotas and milling restrictions partly as a result of their experience with war time food supplies, and partly again, we believe, from fear that a combination of producers in exporting countries, considered individually and collectively, would result in an era of unduly high prices attained by artificial means and not resulting from natural causes."

Later, Mr Darby said Canada's worst external troubles grew from "efforts to make a country, the chief wealth of which lies in the possession and production of raw materials and foodstuffs, into a self-sufficient, self-sustaining and industrial nation."

Mr Reid, submitting the brief for country elevators, pointed out there were 5698 country elevators with total capacity of 198 million bu. in Western Canada. Economic functions of the country elevator "are those of a merchant, a warehouseman and producer's agent," he said.

"Thru all the years of depression, when elsewhere many financial institutions had to suspend payments, no elevator has ever refused to purchase the farmer's grain, and cash tickets issued in payment have always been immediately transferred into spot cash."

Canadian National Railways

Stony Plain and District.

The ladies' rink from Stony, which played in the Edmonton Bonspiel last week, were successful in securing second prize in the contest in which they competed, the Jackson Cup. Their prize was, for each, a handsome travelling rug. The rink comprised: Mrs E F Lewis 1, Mrs J P Miller 2, Mrs F W Yeats 3, Mrs H Oppershauser skip.

Stony Plain Town ratepayers are to hold their annual meeting in the town hall tomorrow, Friday, the 29th. The financial statement for 1936 will be read by the Secretary. The three Councillors whose terms have expired are: T. J. Hardwick, E Anderson, Jac Mayer.

Ratepayers of Stony Plain Consolidated S. D. held their annual meeting in the town hall on Tuesday afternoon, with the chairman, Mrs C Wood, presiding.

The Black Hawks will play for the dance in Kelly's Hall, Friday, Feb. 5.

At the meeting last week of Glory Hills S.D. ratepayers Mr H Wolfe's resignation as Secretary was accepted, and Mr H Jespersen was appointed as his successor. The retiring trustee was re-elected; the Board now comprising: A Jespersen, F Spady, M Schellenberger.

Patrons of The Stony Plain Phone Co. will hold their annual meeting on the afternoon of Sat. Feb. 6th, when the Secretary's report will be presented.

The Community dance on Friday night at Muir Lake Hall was a very successful affair, the members turning out in large numbers.

Spruce Grove News.

Mrs M Lozinski is recovering remarkably well, after her recent operation at Misericordia hospital.

Miss Ruth Schwindt, who is spending a short holiday with Miss A Chalmers, is expected home the latter part of this week.

Due to the flu epidemic which has taken the Grove in its stride, most of the townspeople are staying indoors.

Messrs H Loeblich and H Brox spent a very pleasant week end in the City.

Ice man Brod is busy filling his ice orders for the business houses at the Grove.

Jacob Brox has been gazetted a Commissioner for Oaths.

Severe colds, mis-called influenza, has been confining a number in the district to their homes for quite a spell; but the worst of the epidemic is now said to be over.

The story is going the rounds of the farmer who, on one of his trips to the City, made some inquiries concerning the purchase of a bathtub. It was promptly shipped but went astray. On its arrival by truck last week, the farmer refused to accept it, "I ordered that bathtub last summer," he wrote, "and now winter is on and the bathtub season is practically over. You can exchange it for a wood stove or keep it—I have no use for it."

Dropping the Pilot.

John Hargrave, advisor to the Alberta Social Credit Planning Committee, and leader of the Social Credit Party of Great Britain, on Monday repudiated the Government of Premier Abernethy and left Edmonton, heading South.

Before he left, Mr Hargrave left a statement for the press, in which he attacked the Premier and the Alberta Government, declaring his confidence in them had been shattered. Mr Hargrave said to have condemned the Government as "a mere vacillating machine which operates in starts, stops and reversals."

State Medicine for Alberta.

The matter of state medicine for Alberta with the advantages of competent medical service being brought within the reach of every person in the province at the earliest possible date, was up for discussion at the session in Edmonton recently of the provincial convention of the Alberta Social Credit League. It was urged, at the convention, that the matter be brought to the attention of the Provincial Government.

Christian Science.

At all Christian Science Churches next Sunday the subject of the Lesson Sermon will be "Love." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "As one whom his mother comforteth, so will I comfort you; and ye shall be comforted in Jerusalem." (Isaiah 66:13). One of the corroborative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 517): "In divine Science, we have not as much authority for considering God masculine, as we have for considering Him feminine; for Love imparts the clearest idea of Deity."
